Dr G S G Ayyangar  
Sr Deputy Director General (Administration),  
ICMR, New Delhi.

Subject: Regarding bridging the data gap between COVID-19 Portal (NHP) and State

Respected Sir,

There has been a data gap identified between COVID-19 portal (NHP) and state data of IDSP(Copy enclosed). which requires resolution from ICMR and also at our level. The gaps identified are as under: -

- Positive COVID 19 cases are not reflected on COVID-19 Portal regularly. so gap is apparent. It is to be resolved at the level of ICMR.
- Districts are facing problem in managing wrong entries and duplicate entries and cv-analytics ICMR is not up-to the mark to resolve it. It is to be resolved at the level of ICMR.
- Particulars of other state cannot be processed by district authorities and cv-analytics ICMR is not up-to the mark to resolve it. It is to be resolved at the level of ICMR.
- State is not facilitated by ICMR to make any updation / correction. It is to be resolved at the level of ICMR.
- Entries of old cases which are still pending. are in process at our level and will be completed at earliest. It is further submitted that if the backlog data is updated on the ICMR portal by Labs, then all positive cases will be reflected on the particular day of entry.

It is therefore requested to kindly provide the facility in ICMR portal (Labs) to make entry for the date of incident so that the cases can be reflected on the day of the positive.

(Naresh Kumar Thakral)  
MD(NHM) & Special secretary  
Medical & Health Department
